## Carbon Reduction Plan

June 2022

# Carbon Reduction Plan

## Supplier name

Baywater Healthcare UK Limited

## Publication date

1<sup>st</sup> July 2022

## Commitment to achieving Net Zero

Baywater Healthcare is committed to achieving Net Zero emissions by 2050

# Content

- 4 Baseline Emission Footprint
- 5 Current Emissions Reporting
- 6 Carbon Emissions Projects
- 7 Declaration and Sign Off

# Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

## Baseline Year 2020

### Additional Details relating to the Baseline Emissions calculations

Baseline Emissions (and Current Emissions) have been calculated by taking the total UK emissions of Baywater Healthcare UK Limited and apportioning the emissions for each scope.

The baseline figures have been taken from 2020 when Baywater Healthcare commissioned a third party organisation to assess Carbon emissions for reporting purposes.

During the Covid-19 pandemic, our offices were closed for long periods and business activities were reduced. In addition, we won and mobilised additional contracts which are set to increase our activity. Both of these elements greatly impact our emissions and footprint. We expect to record in 2022, baseline figures that more accurately reflect “Business as Usual”.

### Baseline year emissions:

Emissions	Total (tCO <sub>2</sub> e)
Scope 1	1390.89
Scope 2	188.8
Scope 3 (Included Sources)	18591
Total Emissions	20170.69

# Current Emissions Reporting

## Reporting Year: 2021

Emissions	Total (tCO <sub>2</sub> e)
Scope 1	2077.29
Scope 2	182.23
Scope 3 (Included Sources)	2597
<b>Total Emissions</b>	<b>4856.52</b>

## Carbon Reduction - Projected vs Actual

# Carbon Reduction Projects

## Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2020 baseline. The carbon emission reduction achieved by these schemes equates to 15314.17 tCO<sub>2</sub>e, a 24% reduction against the 2020 baseline and the measures will be in effect when delivering our services.

These schemes below have contributed to a reduction in greenhouse gas emissions and the measures will be in effect when delivering services under contract.

We are not currently able to calculate the tCO<sub>2</sub>e reduction achieved by these schemes or the corresponding percentage reduction achieved against the 2020 baseline.

During 2020/21, energy efficiency measures have been implemented at a number of sites across Baywater Healthcare. The most notable include LED lighting replacements at all sites and the introduction of hybrid vehicles. In addition, we are encouraging a continuation of virtual meetings in lieu of face-to-face attendance on site at client, supplier or our own office sites.

### In the future we hope to implement further measures such as

- Move to a fully electric fleet
- Switch to 100% renewable energy provider
- Encouraging remote working and virtual meetings to reduce business travel by over 40%
- Closely working with suppliers to influence their commitments to reducing Carbon emissions

---

During 2020/21, energy efficiency measures have been implemented at a number of sites across Baywater Healthcare. The most notable include LED lighting replacements at all sites and the introduction of hybrid vehicles.

# Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting .

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard .

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Bidder:

A handwritten signature in black ink, appearing to be 'D. Baker', written over a light blue horizontal line.

## Baywater Healthcare

Baywater Healthcare is a leading specialist provider of homecare services to patients with long term conditions. We deliver outstanding patient care and tailor our service to reflect the needs and challenges of our healthcare partners, while driving efficiencies and delivering cost savings.

Our healthcare services include:

- Home Oxygen Services
- Sleep Apnoea Services
- Recovery Oxygen
- Nebuliser Services
- Managed Telehealth Services
- Ventilation Services
