

Oxygen Machine Filters

1

Find the filter

2

If you can see the filter, or if the cover is easily removed, take the filter out

3

If the filter is covered, and is difficult to remove leave it in

4

If you removed the filter wash it

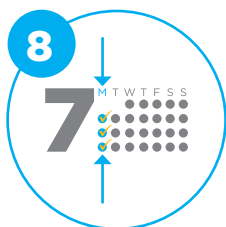

If you left the filter in, vacuum the cover

If you washed the filter, wait for it to dry

When the filter is dry, put it back in the oxygen machine

Clean the filter once a week
