

# DON'T FEED FIRE

## Smoke while using oxygen and you could scar more than your lungs...

Oxygen is very safe, but use it while smoking or come into contact with a naked flame and the picture above could be the result..

This patient walked away with minor burns, but someone else may not be so lucky.

.....

**Helpline: 0800 373 580**

Monday to Friday, 8.00am-5.00pm  
(open 24 hours for urgent calls)

**Remember**  
while using  
oxygen:

- never smoke
- stay away from others who are smoking
- stay away from naked flames eg open fires, candles, gas hobs, tea light candles
